

MEMBER DISCOUNT HIGHLIGHT

Enterprise Fleet Management

Any ABC member looking for total fleet management, Enterprise is a great fit. They offer a full-service fleet management program that helps monitor and control all the expenses associated with operating a fleet of vehicles. Services include everything from acquisition, funding, maintenance, fuel, disposal, and much more.

Each customer has the opportunity to save the most money by using Enterprise Fleet Management. This is achieved by allowing Enterprise Fleet Management to manage the total cost of ownership.

The most visible discount is the vehicle incentives offered by the manufacturer. This will vary by manufacturer and vehicle, but as an ABC member, and regardless of size, each company has access to incentives.

Many customers recognize between a 15-20% cost savings when using all of Enterprise programs. It is not required to use every service available, but it does ensure that operations is the most cost effective fleet possible and ultimately leads to a larger cost savings.

If a company is in the state of Michigan and has at least 20 or more vehicles in their fleet (can be reimbursement vehicles) it qualifies. Once the minimum qualifications are meant, then the necessary contracts and credit underwriting steps will be completed to finish the process.

For more information on the Enterprise Fleet Management benefit, please reach out to either the metro Detroit office or West Michigan office in Grand Rapids. Also, check out the Enterprise Fleet Management site (www.efleets.com) to find anything and everything fleet management along with videos and customer testimonials.

**For More Information: Please contact Enterprise Fleet Management
